Subject: Student Interested in Premise Plumbing Modeling Postdoc?

Hi Kevin,

Hope you are doing well. It was great seeing you in Kingston. I really enjoyed your talk on modeling pressure in homes and just looked through your paper last week. I would love to see your presentation slides too if you are OK sharing them.

I'm also emailing today to mention that we might be able to hire a postdoc to work on premise plumbing modeling, and I am wondering if your student might be close to finishing and interested in working with us. We are pursuing both water quality models within premise plumbing (e.g., lead and legionella) and also developing a premise plumbing version of EPANET to include dispersion and other important changes. I'm copying Jon Burkhardt who would serve as the postdoc mentor. Please note that we can't sponsor a visa so the student would have to be an American citizen or have another way of obtaining a green card / work permit without our sponsorship.

Thanks!

Regan
